DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than payment of the issue fee.

In applicant's amendments to the claims filed on July 26, 2007, it is clearly indicated that Claims 10-12 are cancelled without prejudice or disclaimer of their subject matter, however amended claims still lists claims 10-12 as original. Applicant Arguments/Remarks Made in an Amendment filed on July 26, 2007 also clearly indicates that Claims 10-12 no longer remain pending under current examination.

The application has been amended as follows:

Claims 10-12 are cancelled.

Response to Arguments

2. Objections to drawings and claims are withdrawn in view of the amendments.

Allowable Subject Matter

3. Claims 1, 3, 5-7, 9, 13-20 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art teaches a method and apparatus for incorporating a camera in a housing with a main body and a flexible cable connected to a substrate with a camera IC having ribs that slide into rib slots to hold together the housing. However, the prior art fails to teach

conductive ribs which abut against a pattern on the substrate which is connected to ground for the purpose of electrically connecting the a shield holder to the ground of the camera IC. The prior art also fails to teach a flexible cable connected to the substrate where part of the cable is between the substrate and the bottom of the recess in the main body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujimoro et al. (US 6637895) teaches in Fig. 3 a housing with ribs and rib slots and window opening.
